Profile

With over 10 years experience in photography, video & design, I would love to pivot my career into a software developer role to utilize my rapid & continually growing skillset.

Projects

SeattleTransit - Mobile-first web app created using One Bus Away API. Users can query a bus stop near their current location & view a list of incoming busses for a specific stop. Built with Node.js, EJS, JS, HTML5

Tools Everywhere - Tool library app where users can log in and add tools they own to the sharing library. Built with Django, HTML5, CSS, Materialize

Simon Game - A take on the game Simon. Built with vanilla JS, HTML5 and CSS. The game displays a pattern that players then repeat back as the sequence increases by one each round

Technical Skills

Javascript	CSS	HTML5	NodeJS	Express	React	Django
Materialize	Bootstrap	Python	Heroku	Adobe CC	QA Testing	

Experience

Owner – Tack Photography – 2007-present
- Consulted with key project stakeholders with the City of Kenmore to build a photo asset library for use in marketing materials, ads & social media
